# Declaration

We, ..... students of **BS(Hons)** in the subject of **Computer Science** session **2017-2021**, hereby declare that the matter printed in this thesis titled, **PETS CRACKER** is my own work and has not been printed, published and submitted as research work, thesis or publication in any form in any University, Research Institution etc in Pakistan or abroad.

Date: \_\_\_\_\_

Signatures of Deponent

# Research Completion Certificate

It is certified that the research work contained in this thesis titled **PETS CR-CKER** has been carried out by **Muhammad Waleed** Roll. No **0144-BSCS-17** and **Farhan Aslam** Roll. No **0093-BSCS-17** under my supervision.

---

**Supervisor Name**  
**Designation**

**Date:** \_\_\_\_\_

**Submitted Through**

# Acknowledgements

I am grateful to the Almighty Allah, Who blessed me with health, wisdom, knowledge, thoughts and opportunity to make some contribution in the form of present effort. I offer my humblest thanks from the deepest core of my heart to the **Holy Prophet Muhammad (Peace be upon him)**, the most perfect and excelled among and ever born on the surface of earth. The research work embodied in this dissertation was accomplished under the able guidance and affectionate supervision of **Sir Yahya Khurram**, Assistant Professor, GC University, Lahore. I will always remember his moral encouragement, skillful guidance, positive criticism and valuable advice throughout the course of my study. I also express my feelings of love and respect for my beloved parents that are the real asset of my life and gave me confidence and my friends also deserve my thanks for their loving encouragement and prayers for my success.

## ***Dedication***

*My research work is dedicated to my family and my honorable teacher **Sir Yahya Khurram** who encouraged and helped me to complete my research in the area of formal modeling and formal verification related to computer science.*

# *Abstract*

The growth of the internet over last 10 years as a medium of information and as a communication technology has provided the opportunity for selling products and services online directly to the the public. This thesis looked into how websites were viewed from the managerial side of the veterinary practice by conducting in-depth interviews with Online Content Sellers find it important to use everything available to them to gain the trust of new potential clients, they also wanted to start.

# Chapter 1

## Introduction

### 1.1 Introduction

#### 1.1 Overview

Pet Cracker is a web-based project built using **ASP.NET CORE** and **SQL Server 2017** as a Database. The visitor on the website will have the option to buy pets from our store online or they can also have an option to buy pets from the registered users on our website that will post the advertisement of their pets to sell. Other than Pets there will be other categories like Accessories, Food, etc. that a buyer can buy. The registered user will also have a feature to make an appointment with our static veterinarian. This Web Application will also have a little feature of inventory Database that will manage the sellers profile like their sold items, profits, loss, and best product.

#### 1.2 Problem Statement

This is a work considering the situation nowadays where there is no proper system to fulfill the demand of pets. It is always difficult to get desired pet in case of emergencies. Our goal is to design such a web app which will connect people with us and we will help them according to their requirements directly.

#### 1.3 The Idea

In the previous semester we have studied programming web engineering. After studying that subject our interest has been tilted towards this field of computer science. We had come up with an idea to work on social web application.

#### **1.4 Objective of project**

To provide a new platform for pet sellers and buyers. 1-To reduce the distance and time searching for pets/food/accessories. 2-To make a virtual or physical appointment with the veterinarian.

#### **1.5 Purpose**

The main aim is to make easy to take care of your pets. Now a day's everything is online but still when it comes to pet facilities there are very less options available on internet. This will do ease to those who have pets and consider it very difficult to take them for regular checkups and different medications. This document has shown use cases and different scenarios that how this website will work under different facilities, by using data modules and verification.

**1.6 Scope** There is a wide scope of development of this project. Because it resolves two very troublesome problems.

**1-Availability:** as many of people do not know that where to buy pets/food/accessories. Now people can easily search for it. **2-Time and distance:** People do not need to go out and search for the pets. They can get them online while sitting on their couches.

So, we can say this project has wide scope.

#### **1.7 Literature Review**

Nowadays it is a very difficult task to find and buy pets, their food, and accessories. But now they will find it easy get them and can have updates about new pets. Thinking about health of pets it will be helpful for users to get pets feeding tips. Mostly every person is busy today's world and wants to save time so if he wants to make an appointment with our vet they can do that easily on our website rather

---

than go to clinic and wait for hours to get their turn. So, it sounds fascinating to people to get their pets easily.

# Chapter 2

## Requirement Specification

A software requirement specification helps programmers in catching the complete explanation about how the system is expected to perform. This chapter provides detailed plan of the project which includes user characteristics, general constraints and specific requirements by using use case diagram with specifications. These requirement is of two types.

- **Functional Requirements**
- **Non-functional Requirements**

### 2.1 Functional Requirements

The functional requirements of this system are:

#### 2.1.1.1 Pet suppliers

- Seller needs to have a valid supplier account and must be logged in to the system.
- This is a supplier or seller account where an account holder can sale his/her pets.
- Any user can see this without signing in.

#### 2.1.1.2 Food

- This is a seller or supplier account where an account holder can sale his/her pet food items.
- Seller needs to have a valid account and must be logged in to the system
- Any user can see this without signing in.

#### **2.1.1.3 Accessories**

- This is a seller or supplier account where an account holder can sale his/her pets related accessories.
- Seller needs to have a valid account and must be logged in to the system
- Any user can see this without signing in.

#### **2.1.1.4 Blog**

- Updates about new material to the website about pets, their accessories, and food items.
- Suggestions regarding dealing pets and their health tips.

#### **2.1.1.5 About Us**

- Give a peek behind the curtains. Tells visitors what they should know about this website.
- List credentials, certificates, awards, services and importance.

#### **2.1.1.6 Contact**

- In case user wants to communicate with the admin of website.
- For communication user can use customer support

#### **2.1.1.7 User registration and login**

- User needs to create a login for accessing the functionality of the website. If the user is new, he/she needs to create a new account of the user has already created he/she has to enter login details.
- User needs to enter valid details in the prompt box shown on the screen.

#### **2.1.1.8 Log out**

- After performing his/her task user can logout from his account.
- User gives logout command at any time.

#### **2.1.1.9 Search**

- User can search any other user or product item of his/her choice.
- User need to use search button for to search product or user.

#### **2.1.1.10 Product categories**

- User can search for a specific product (pets, food, accessories) by using categories button.
- A categories button contains list of classes of pets, food, and accessories.

#### **2.1.1.11 Filter Search**

- User can filter his/her search for specific range of price or product.
- Filter will provide user with range of products he/she asked for.

#### **2.1.1.12 Order through call and message**

- Order button contains to two buttons for contacting to seller.
- Message button will take user to Whats App where he/she can ask for order to seller.
- Call button will take user to local mobile call. So, user can give order to seller on call.

#### **2.1.1.13 Appointment**

- Vet can set appointments time according to his availability
- Users can set appointment from the given time available.

#### **2.1.1.14 Favorite**

- Users can add products to their favorite.
- Registered users will have a feature of favorite in which they can compare different products to buy.

## **2.2 Non-functional Requirements**

The non-functional Requirements of this web app are:

### **2.2.0.1 Flexibility**

Users can use different devices whether desktop computer or mobile phones so interface is user friendly.

### **2.2.0.2 Performance Requirements**

Web server is always available for users all 24/7, also connections to the server will be based on criteria of user like his internet connection.

### **2.2.0.3 Response Time**

A fast site is good user experience and satisfying user experiences leads to higher conversions. Excellent response time should be provided by the website.

### **2.2.0.4 Reliability**

The system should provide a reliable environment to the user.

### **2.2.0.5 Availability**

All functionalities of the system should be available to the user at any time user wants to access

### **2.2.0.6 Validity**

As different types of forms are part of system that requires data from user. For this purpose system should validate user data on every field.

### **2.2.0.7 Maintainability**

There is no maintainability phase for our system right now as we want to develop it further.

### **2.2.0.8 Data Integrity**

---

Data will be kept safe in databases and will be updated regularly. No data loss will happen. There will be very less information stored in the database, all the tasks and sensitive information will be added and used on the front end and will be discard after use.

TABLE 3.2: UC-02, User()

<b>Use Case Name</b>	Sign in
<b>Primary Actor</b>	User
<b>Precondition</b>	System has been programmed to login the existing user
<b>Trigger</b>	Click Login
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Open the Web application</li><li>• Enter correct username and password</li><li>• Click Login</li></ul>
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.3: UC-03, User()

<b>Use Case Name</b>	Search
<b>Primary Actor</b>	User(viewer)
<b>Precondition</b>	System has been programmed to allow search
<b>Trigger</b>	Click Search Button
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Login to your account</li><li>• Click on search box</li><li>• Type product name and press enter</li></ul>
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Product not exist</li><li>• Product is out of stock</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.4: UC-04, User()

<b>Use Case Name</b>	Update Profile
<b>Primary Actor</b>	User
<b>Precondition</b>	System has been programmed to update existing details of user
<b>Trigger</b>	System has been programmed to update existing details of user
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Login to your account</li><li>• Edit your profile</li><li>• Enter new details and click update</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Rare
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.5: UC-05, User()

<b>Use Case Name</b>	Verify User
<b>Primary Actor</b>	User
<b>Precondition</b>	System has been programmed to verify User of user
<b>Trigger</b>	User verified User do not exist
<b>Scenario</b>	<ul style="list-style-type: none"><li>• User available</li><li>•Logged IN</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	High
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.6: UC-06, User()

<b>Use Case Name</b>	Contact Product Owner
<b>Primary Actor</b>	User
<b>Precondition</b>	Internet Connected Website Opened Perfect match found.
<b>Trigger</b>	Primary: When user have found perfect match for his pet.
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Request to other pet owner sent</li><li>• Response from pet owner received.</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	High
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.7: UC-07, User()

<b>Use Case Name</b>	Add to favorite
<b>Primary Actor</b>	User
<b>Precondition</b>	Internet Connected Website Opened Product Selected
<b>Trigger</b>	Primary: Product Added to fav. Secondary: Direct view fav by clicking.
<b>Scenario</b>	Product added to fav.
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Internet not working</li><li>• Product not available</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	High
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.8: UC-08, User()

<b>Use Case Name</b>	View product details
<b>Primary Actor</b>	User
<b>Precondition</b>	Internet Connected Website Opened Products added to cart already.
<b>Trigger</b>	Primary: When products are added to the cart and user wants to confirm the order
<b>Scenario</b>	Order confirmed. <ul style="list-style-type: none"><li>• Payment method Opens.</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	High
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.9: UC-09, User()

<b>Use Case Name</b>	Remove Product
<b>Primary Actor</b>	User
<b>Precondition</b>	<ul style="list-style-type: none"><li>●Internet Connected</li><li>●Website Opened</li><li>●Already Registered</li></ul>
<b>Trigger</b>	Primary: Delete product from owner profile
<b>Scenario</b>	Product Deleted
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Low
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface

TABLE 3.22: UC-22, User()

<b>Use Case Name</b>	Make appointment
<b>Primary Actor</b>	User
<b>Precondition</b>	<ul style="list-style-type: none"><li>•Internet Connected</li><li>•Website Opened</li><li>•Logged in</li></ul>
<b>Trigger</b>	Primary: user can view requests from owner for the appointment of video talk in Virtual Clinic. He can set appointment according his availability
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Make Appointment.</li><li>•Notification sent to user.</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.23: UC-23, Admin()

<b>Use Case Name</b>	Sign in
<b>Primary Actor</b>	Admin
<b>Precondition</b>	System has been programmed to login the existing admin
<b>Trigger</b>	Click Login
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Open the Web application</li><li>• Enter correct Admin-name and password</li><li>• Click Login</li></ul>
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.24: UC-24, Admin()

<b>Use Case Name</b>	Verify Admin
<b>Primary Actor</b>	Admin
<b>Precondition</b>	System has been programmed to verify Admin
<b>Trigger</b>	Admin verified Admin do not exist
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Admin available</li><li>• Logged IN</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.25: UC-35, Admin()

<b>Use Case Name</b>	Admin not found
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Register Admin Accessed</li></ul>
<b>Trigger</b>	Primary: Admin wants to Log IN Secondary: Admin clicked on our facilities.
<b>Scenario</b>	Incorrect Admin name or pass
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Medium
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.26: UC-26, admin()

<b>Use Case Name</b>	Update Blog
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Register Admin Accessed</li></ul>
<b>Trigger</b>	Primary: Click direct on the blogs section Secondary : New content added in blogs section
<b>Scenario</b>	Blog updated
<b>Exceptions</b>	Incorrect details entered
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.27: UC-27, Admin()

<b>Use Case Name</b>	View Report
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Register Admin Accessed</li></ul>
<b>Trigger</b>	Primary: Admin view report Secondary: Admin takes action
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Faulty product</li><li>• Wrong product</li></ul>
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.28: UC-28, Admin()

<b>Use Case Name</b>	Block user
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Rules disturbed</li></ul>
<b>Trigger</b>	Primary: user acted against the website rules Secondary: Admin blocked user
<b>Scenario</b>	User did not follow the rules defined the website authority and user did not follow. So, he/she is blocked
<b>Exceptions</b>	Incorrect details entered
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Medium
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.29: UC-29,Admin()

<b>Use Case Name</b>	Add product
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Logged in</li></ul>
<b>Trigger</b>	Primary: new product added in stock
<b>Scenario</b>	New product is added to the stock
<b>Exceptions</b>	Incorrect details entered
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.30: UC-30,Admin()

<b>Use Case Name</b>	Update product
<b>Primary Actor</b>	Admin
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Logged in</li></ul>
<b>Trigger</b>	Primary: products updated
<b>Scenario</b>	New Product updated
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.31: UC-31,Vet()

<b>Use Case Name</b>	Sign in
<b>Primary Actor</b>	Vet
<b>Precondition</b>	System has been programmed to login the existing vet
<b>Trigger</b>	Click Login
<b>Scenario</b>	<ul style="list-style-type: none"><li>• Open the Web application</li><li>• Enter correct username and password</li><li>• Click Login</li></ul>
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.32: UC-32,Vet()

<b>Use Case Name</b>	Verify vet
<b>Primary Actor</b>	Vet
<b>Precondition</b>	System has been programmed to verify vet
<b>Trigger</b>	vet verified vet do not exist
<b>Scenario</b>	<ul style="list-style-type: none"><li>• vet available</li><li>• Logged IN</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.33: UC-33,Vet()

<b>Use Case Name</b>	vet not found
<b>Primary Actor</b>	Vet
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Register Admin Accessed</li></ul>
<b>Trigger</b>	Primary: vet wants to Log IN Secondary: vet clicked on our facilities
<b>Scenario</b>	Incorrect vet name or pass
<b>Exceptions</b>	<ul style="list-style-type: none"><li>• Incorrect details entered</li><li>• Internet not working</li></ul>
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Medium
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.34: UC-34,Vet()

<b>Use Case Name</b>	Add Blog
<b>Primary Actor</b>	Vet
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Logged in</li></ul>
<b>Trigger</b>	Primary: Click direct on the blogs section Secondary : New content added in blogs section
<b>Scenario</b>	Blog updated
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server

TABLE 3.35: UC-02, Vet()

<b>Use Case Name</b>	Set appointment
<b>Primary Actor</b>	Vet
<b>Precondition</b>	<ul style="list-style-type: none"><li>• Internet Connected</li><li>• Website Opened</li><li>• Logged in</li></ul>
<b>Trigger</b>	Primary: vet can view requests from user for the appointment of video talk in Virtual Clinic. He can set appointment according his availability
<b>Scenario</b>	<ul style="list-style-type: none"><li>•Appointment set.</li><li>•E-mail sent to vet.</li></ul>
<b>Exceptions</b>	Internet not working
<b>Priority</b>	Must be implemented
<b>Frequency of use</b>	Many times a day
<b>When Available</b>	At first increment
<b>Channel to Actor</b>	Graphical User Interface
<b>Secondary Actor</b>	Server
